

**RECOMMENDATION OF THE HONORABLE LAYN PHILLIPS REGARDING THE
INTERTRIBAL ALLOCATION MATRIX**

Native American Tribes participated in the Purdue Mediation process and reached agreement with the other non-Federal Public Claimants on value allocation for the Tribes.

Following the Mediation, the Tribal Leadership Committee (“TLC”) contacted me to request an opportunity to present for approval the Intertribal Allocation Matrix. I agreed to hear the presentation and requested materials to review in advance of the presentation. In response to my request, I received the following documents:

- 1) PowerPoint summary of the intertribal allocation model
- 2) One-page summary of the model titled, “Tribal Allocation Matrix Narrative
- 3) Excel spreadsheet with the allocation to the tribes.

In addition, I sent the TLC my preliminary thoughts and inquiries regarding the Intertribal Allocation Matrix for their consideration prior to the presentation that occurred on April 2, 2021.

The TLC presented the Intertribal Allocation Matrix to attorney Clay Cogman and me on April 2, 2021. We had sufficient time to thoroughly discuss the allocation model and the TLC addressed to my satisfaction all questions and issues that were raised.

I note here for context that in a typical mediation setting, I would have had the opportunity to hear from other constituencies for the purpose of assisting me in my analysis by providing me alternative perspectives designed to test the premises and assumptions of the underlying methodology. That did not occur here, as I have only spoken to the TLC about the Matrix.

That said, based on the foregoing, I find that the Intertribal Allocation Matrix provides a satisfactorily reasonable and transparent methodology for the allocation of Purdue settlement funds among Native American Tribes.

Layn R. Phillips

Schedule E
Tribal Allocation Matrix

The Tribal Nation’s allocation matrix is built around six data points: MMEs (morphine milligram equivalents) imputed to each Tribe; drug and prescription opioid overdose rates imputed to each Tribe; Indian Health Service (IHS) user population for each Tribe; citizenship population for each Tribe; relative poverty rates imputed to each Tribe; and relative cost of living imputed to each Tribe. Data are “imputed” to a Tribe by estimation based on population when the data is only available on a county or statewide basis. In the case of MMEs and drug overdose rates, the imputation of the data to a tribal population is multiplied by a “disproportionate impact” adjustment reflecting the higher incidence of opioid use disorder and prescription opioid overdose deaths in tribal communities.

Two computations are undertaken for all Tribes, and then combined together. 85% of a Tribe’s matrix share is calculated by considering its imputed MME rate (50%), overdose rates (40%), and poverty rate (10%) as applied to its IHS user population. 15% of a Tribe’s matrix share is calculated by considering the same three elements, similarly weighted, as applied to the Tribe’s citizenship data. Once these two matrix results are combined, the resulting share is further adjusted by each Tribe’s relative cost of living. COLA adjustments are done on a regional basis and are weighted at 10%, resulting in modest adjustments ranging from 1.3% down to 2.4% up.

Data for Alaska Tribes was initially computed on a statewide basis, and the resulting matrix share for Alaska was then subdivided among Alaska Tribes and tribal organizations participating in the Alaska Tribal Health Compact (employing the same methodology historically used to allocate certain other tribal health care funds across Alaska tribal health care providers).

The matrix allocates individual amounts to each California Tribe, although four intertribal health care providers in California have also separately filed litigation. Each such intertribal provider will engage in discussions with its member tribes and agree on an amount that the member tribes will allocate from their funds to the intertribal provider.

Tribal citizenship data used in the matrix was subject to a tribal verification process (except for Alaska, where data was drawn from the U.S. Census). In instances where IHS user population data for multiple Tribes was not allocated by IHS to individual Tribes, user populations were prorated across the Tribes within an IHS service unit based on the Tribes’ relative tribal citizenship.
